The lesson focused on solving quadratic equations using the factoring method. I prepared visual aids, interactive problems, and group activities to encourage collaboration. The class consisted of 30 students with diverse learning styles and abilities. I began by reviewing key concepts, then guided students through examples, and finally assigned group tasks to reinforce their understanding.

Analysis and Reflection

Overall, the lesson was successful in capturing students? interest. The use of visual aids and group work facilitated active participation. However, I noticed that some students struggled with the initial explanation, indicating the need for differentiated instruction. I felt confident in my delivery but became aware that pacing was crucial; I needed to allocate more time for questions and practice.
